

# SMARTER FLEETS SOLUTIONS

Smart, plug-and-play device designed to optimize fleet performance. It provides real-time control, theft prevention, fuel savings, and driver behavior monitoring, all accessible via a mobile app.

— Want a safer, more efficient fleet?

## What's New Of Our Product

Maximize Fleet Security & Efficiency with Guardian-i

It features theft prevention by locking the accelerator in case of unauthorized use, fuel savings of up to 20%, and real-time remote control via a mobile app. Fleet managers can monitor driver behavior, reduce engine wear, and ensure compliance with safety standards. With quick installation and seamless integration, Guardian-i helps fleets operate more efficiently while cutting costs and minimizing risks.

### Enhanced Security

Automatically locks the accelerator in case of unauthorized movement.

Secure

### Vehicle Longevity

Reduce wear and tear with smooth acceleration and efficient fuel usage.

Save

### Better Driver Performance

Improve driver safety and reduce unnecessary fuel consumption.

Optimize

### Cost Reduction

Reduces fuel consumption by up to 20% with optimized driving performance.

### Remote Fleet Management

Easily manage all vehicles from your phone, ensuring higher efficiency.

### Plug & Play Installation

Quick and easy setup with no engine modifications required.
